## **NEW** Compatible File Formats

**MARKING SYSTEMS, INC.** would like for label purchases to be the easiest thing you do. In an effort to be as compatible as possible with our customers, **MSI** uses the following four programs to generate artwork:

**AutoCAD Release Any;**  
**Adobe Illustrator version Creative Suite (CS3);**  
**Corel Draw Graphic Suite (version 12);**  
**FreeHand MX (version 11).**

This allows **MSI** to accept a wide range of file formats.

Below is a list of preferred file formats for each program. This list however is not all-inclusive. If you have a question about a file format please call Razvan Datcu at (972) 475-0770 ext. 214 or Constance Popa ext. 278.

AutoCad	Adobe Illustrator	Corel Draw	Free Hand
.dxf	.ai	.cdr	.fh3 thru .fh11
.dwg	.eps	.cmx	.ft11
	.pdf		.eps
	.art		

Other popular drafting or desktop publishing programs such as ProE will allow you to export to a file format that we can use. ProE will export as an AutoCAD DXF.

Please remember when using any desktop publishing software, convert all text to outlines or include these fonts with your email.

The best way to transfer files to **MSI** is to email them as an attachment. Files should be zipped or compressed whenever possible. This will keep download time to a minimum.
